Data access renewal for Business Automation Message (app ID 444556051679202)

Downloaded on November 6, 2025, 5:22 AM PST

Data handling

processor-0. Do you have data processors or service providers, including your own companies, that will have access to the Platform Data that you obtain from Meta? Data processors or service providers are separate entities that, on your behalf, process the Platform Data made accessible to you in order to provide you with a service. Please provide the names of any processors that will have access to the Platform Data made accessible to you through the requested permissions and features. "Platform Data" is any data that you receive from Meta (e.g., Meta user ID, email address, profile picture, Meta API user access token, and app secret).

Yes

processor-2. List all data processors or service providers, including your own companies, that will have access to the Platform Data that you obtain from Meta. Please note that Platform Data may include a subset of personal data or personal information that relates to an identified or identifiable person.

- akgraphicsstudios
  - **processor-1a. For which category of services will this data processor process the personal data of users received from Meta? Select all that apply.**
    - IT solutions and services, including cloud storage and processing
  - **processor-1b. List all countries where this data processor will process the personal data of users received from Meta. Include locations from which the data processor will access the data remotely, via the internet. Select all that apply. Many data processors provide this information on their corporate website.**
    - India

responsible-1. Who is the person or entity that will be responsible for all Platform Data Meta shares with you? Please provide the name of the legal entity that will control the data (i.e., determine the purposes and means of processing the data) made available to you by Meta through the requested permissions and/or features. This could be a natural or legal person, a public authority, an agency or other entity. In some regions this is called a data controller.

IT solutions

responsible-2. Select the country where this person or entity is located.

India

requests-3. Have you provided the personal data or personal information of users to public authorities in response to national security requests in the past 12 months? This does not include requests related to search warrants or court orders associated with criminal investigations. Personal data or personal information is any data you receive from Meta that relates to an identified or identifiable person.

No

requests-4. Which of the following policies or processes do you have in place regarding requests from public authorities for the personal data or personal information of users? Check all that apply.

- None of the above.

Web reviewer instructions

Where can we find the app? This could be a URL. Use our debugger to verify that our reviewers can access the URL.

Our main Web Application is on : https://anantkamalwademo.online Admin Credentials for Dashboard : Login URL : https://anantkamalwademo.online/login Username/email : support@anantkamalwademo.online Password : Pooja@24081978 The app is accessible via the webhook URL: https://anantkamalwademo.online/getFacebookLeadInfo. This URL allows you to test the integration and functionality for fetching Facebook lead information.

Provide instructions for accessing the app so we may complete our review. Explain how to navigate to the app, and provide instructions for testing.

This is a simple lead automation web application. And we plan to send auto leads to WhatsApp directly to the users. You can access the main application via https://anantkamalwademo.online Admin Dashboard Credentials : Login URL : https://anantkamalwademo.online/login Username/email : support@anantkamalwademo.online Password : Pooja@24081978 We have created one webhook API calling URL for Demo. Navigate to the URL https://anantkamalwademo.online/getFacebookLeadInfo. The webhook processes the data and returns a response demonstrating the integration flow. And it will display the API response at the same time. We are getting a message on whatsApp. No additional login or app installation is required for this demonstration.

(optional) If payment or membership is required to access the full functionality of this app, provide access codes or test credentials so we can access and review all features on this app. Codes should be active for one year after submission.

There are no payment or membership requirements for the current version of this webhook application. It is freely accessible via the provided URL for testing purposes. Only Login Credentials you need : Admin Dashboard Credentials : Login URL : https://anantkamalwademo.online/login Username/email : support@anantkamalwademo.online Password : Pooja@24081978

(optional) If payment is required to download this app, provide 8–10 gift codes so we can download it from app stores without payment.Codes should be active for one year after submission.Include any codes or test credentials required to access in-app subscriptions, purchases, or features.

This is not a downloadable app. Testing can be performed directly through the provided URL. No payment or gift codes are required.

(optional) If access to this app or any of its features is limited to users within a specific geographic location or restricted by geo-blocking or geo-fencing, explain the restrictions and provide a list of locations.For example, specify the countries where the app can be accessed.

There are no geo-restrictions or geo-blocking applied to this webhook URL. It is accessible globally. Reviewers can access the app directly from any location without additional steps.

Include supporting documentation. (Optional) For example, you can upload a screen recording or images that show how to access the app, log in, and how the app uses Meta APIs. You can upload multiple files, maximum 2 GB each. We accept .xls, .xlsx, .csv, .doc, .docx, .pdf, .txt, .jpeg, .jpg, .png, .ppt, .pptx, .mov, .mp4, .zip and .zipx.
