EXPERIENCE

Flutter Developer

Rakibe dynamics

May 2025 – Present **On-Site**

- Developed and maintained cross-platform mobile and web applications using Flutter and Dart.
- Implemented Firebase services (authentication, cloud storage, push notifications) to enhance app functionality.
- Used SharedPreferences for efficient local data storage and state persistence.
- Built and contributed to multiple projects ranging from mobile apps to admin dashboards.
- Collaborated with team members to deliver scalable, user-friendly solutions while following Agile practices.
- Continuously learning and applying new tools, frameworks, and best practices in Flutter development.
- **Technologies Used**: Dart, Flutter, Firebase, SharedPreferences, REST APIs integration, Android Studio/ Vs Code

Flutter Developer Intern

Infusion IX Infotech Pvt Ltd

June 2024 – Dec 2025
Remote

- Completed a 6-month internship focused on Flutter app development.
- Built an Instagram clone app with features like login, profile management, and photo sharing.
- Developed a Health Insurance app with policy browsing, user registration, and claim request features.
- Worked primarily on frontend development, learning Flutter and Dart from the basics without backend tools.
- Gained strong knowledge of UI design, widget tree, state management, and navigation. Learned to structure scalable code and debug efficiently while following best practices.

TECHNICALS SKILLS

Programming Languages

- Basic Java, C, Python, JavaScript, Dart, HTML, Css

Frameworks & Libraries

- Flutter, Firebase SDK, SharedPreferences, HTTP, Image Picker

PROJECTS

1. Money Delivery

- Developed a cross-platform Money Delivery mobile application using Flutter and Dart.
- Integrated Firebase for data storage, authentication, and real-time updates.
- Implemented REST APIS and custom endpoints to fetch and manage user details and transaction data.
- Used GeoLocator library to fetch user addresses and enable location-based delivery tracking.
- Applied state management techniques for smooth navigation and efficient data handling.
- Designed a secure and user-friendly interface for managing money transfers and delivery requests.
- Worked with multiple Flutter libraries to enhance app functionality.
- Intehrated Google AdMob advertisements including banner ads, native ads to monetize the application effectively.

2. Money Delivery Admin Panel

- Developed admin panel on web for money delivery application.
- Integrated Firebase for data storage, authentication, and real-time updates.
- Built an Admin Panel with a dashboard design using side drawer navigation, allowing administrators to monitor transactions, manage users, and track delivery activites.
- Applied state management techniques for smooth navigation and efficient data handling.
- Designed responsive UI/UX to ensure usability across devices.

3. Sticker Desgin & Printing Web Application

- Design and developed a custom sticker creation platform for production company, enabling them to digitize and streamline their sticker designing and printing work flow.
- Built profile management with constant company details (e.g. name, logo, contact info) that are auto-applied to sticker templates.
- Implemented two core sticker creation modules:
  - Create Stciker – User generate stickers with predefined permanent fields for standard labeling.
  - Customize Sticker – User add custom fields dynamically for flexible sticker design.
- Added logo for sticker basis on company.
- Added a Saved Labels feature allowing users to store and reuse sticker templates, reducing repetitive work.
- Integrated a PDF generation system that lets users export sticker sheets with adjustable layouts: 8, 10, 12 stikcer per A4 Page.

EDUCATION

BSc Computer Science 8.16 CGPA

KTHM College, Nashik 2022 – 2025

HSC 77%

BAMU University 2021 – 2022

SSC 83%

BAMU University 2029 – 2020
