EDUCATION

Sandip University **Nashik**

B.Tech in Computer Science and Engineering August 2022-May2026

SKILLS SUMMARY

- **Languages:** Python, SQL, C,Solidity,Java,HTML,CSS,Javascript
- **Frameworks:** Flask, SQLAlchemy, Pandas, NumPy,Express.js,Node.js
- **Tools:** Git, Postman, MySQL, Excel, JWT, Flask-Mail
- **Platforms:** Jupyter Notebook, Google Colab, VS Code, PyCharm
- **Soft skills:** Communication, Problem Solving, Teamwork, Self-Learning

WORK EXPERIENCE

Fresher

PROJECTS

Replica of Bitcoin Blockchain |

A simplified Bitcoin-like blockchain system built entirely in Python. The project demonstrates the core principles of Bitcoin, including block creation, transaction handling, proof of work, and basic wallet functionality.

Batch face recognition |

Developed a Python-based batch face recognition software capable of processing and identifying multiple faces across images or video frames using OpenCV and face recognition libraries. Implemented efficient face detection, encoding, and matching techniques to enable accurate and scalable identification.

User Authentication API |

Developed a RESTful Flask-based backend system for user authentication and product management using SQLAlchemy and JWT. Implemented secure registration, login, email verification via Flask-Mail, and token-based session handling. Integrated full CRUD operations for products with filtering, sorting, and pagination features, ensuring scalability and modularity through Blueprints and ORM-based architecture.

A React Todo App |

Developed a responsive web-based task management application using React.js. Enabled users to create, edit, delete, and organize tasks, with local storage persistence and timestamp tracking. Gained practical experience in frontend development, state management, and responsive web design.

CERTIFICATES

Python Programming for beginners **October 2023**

Learned fundamental Python syntax, operators, loops, functions and data structures.
